

Aurora Cloud Platform

Service Level & Support Policy

1. Overview

This document describes the service level commitments, support tiers, escalation process, data protection practices, and security incident response procedures for the Aurora Cloud Platform. It applies to all customers on a paid subscription plan.

2. Uptime Commitment

Aurora Cloud Platform commits to 99.9% monthly uptime for the core API and dashboard. Uptime is measured as the percentage of five-minute intervals in a calendar month during which the platform successfully responds to automated health checks. Scheduled maintenance windows (see Section 8) are excluded from the uptime calculation. Outages caused by a customer's own network, third-party integrations, or force majeure events are also excluded.

3. Support Tiers

Every account is assigned one of four support tiers. Response time targets are measured from the moment a ticket is submitted to the moment a support engineer first responds, not to resolution.

Tier	Monthly Price	Critical Response	Normal Response	Channels
Bronze	\$0 (included)	24 hours	3 business days	Email
Silver	\$199	8 hours	1 business day	Email, Chat
Gold	\$799	2 hours	4 business hours	Email, Chat, Phone
Platinum	\$2,499	15 minutes	1 business hour	Email, Chat, Phone, Dedicated Slack

"Critical" severity means a total outage or a security-impacting defect with no workaround. "Normal" severity covers all other requests, including questions and minor bugs.

4. Escalation Process

If a ticket is not resolved within its tier's response window, it is automatically escalated through the following path: Tier 1 Support -> Tier 2 Support (specialist engineer) -> Platform Engineering on-call -> VP of Engineering. Each escalation step must acknowledge the ticket within 30 minutes of receiving it, regardless of the customer's support tier. Customers on Gold and Platinum tiers may request immediate

escalation to Tier 2 by marking a ticket "urgent" in the dashboard.

5. SLA Credits

If actual monthly uptime falls below the 99.9% commitment in Section 2, affected customers receive a service credit automatically applied to their next invoice -- no request or ticket is required. Credits are tiered: 10% of that month's subscription fee for uptime between 99.0% and 99.9%, and 25% of that month's subscription fee for uptime below 99.0%. Credits are calculated only against unscheduled downtime; time within an announced maintenance window (Section 8) never counts against the uptime commitment and therefore never generates a credit.

6. Data Backup & Retention

Customer data is backed up automatically once per day. Daily backups are retained for 30 days, after which they are permanently deleted. Point-in-time recovery is available for any moment within the preceding 7 days. In the event of a full regional outage, Aurora's disaster recovery plan targets a Recovery Time Objective (RTO) of 4 hours and a Recovery Point Objective (RPO) of 1 hour, meaning up to 1 hour of the most recent data could be lost in a worst-case disaster recovery scenario.

7. Security Incident Response

A security incident is any confirmed unauthorized access to customer data. Upon confirming an incident, Aurora's security team will notify all affected customers within 72 hours, by email to the account's designated security contact. This 72-hour notification window is independent of, and not tied to, the support-ticket response times in Section 3 -- a security incident notification is initiated by Aurora's security team proactively and is not a response to a customer-submitted ticket. Affected customers will also receive a written post-incident report within 15 business days of the notification.

8. Change Management & Maintenance Windows

Routine maintenance is performed during a standing weekly window: Sundays, 02:00-04:00 UTC. Maintenance windows are announced at least 5 business days in advance via the status page and email. Emergency maintenance outside this window may occur without advance notice if required to address an active security vulnerability, and is likewise excluded from the uptime calculation in Section 2.

9. Contacting Support

Bronze and Silver tier customers can reach support by email at support@auroracloud.example or through the in-app chat widget. Gold and Platinum tier customers additionally have access to phone support. Platinum tier customers are assigned a dedicated shared Slack channel with their account team for real-time communication.
